

HIGHLY ACTIVE BIOTREATMENT FOAM FOR KITCHEN SIPHONS AND BATHROOMS

FORMULA
EXCLUSIVE TO IPC

photo non-binding

BIOCAN MOUSSE

BATHROOMS

ACTION

- Biotreats

INNOVATIVE:

- Ultra-compact expanding foam for easier and faster breakdown of organic and uric deposits.
- Reinforced action on vertical walls thanks to the exceptional resistance of the foam. No running.
- Acts in the first 20-30 cm of pipes = Main source of rising odours.
- Boosted scent for longer-lasting action in the treated areas.
- ECONOMICAL: 1 aerosol = 200/300 siphon treatments.

PROTECTS:

- Applies a protective biofilm that prevents further deposits of limescale and uric scale over time.
- *Natural surfactants easily biodegradable (according to the OECD 301 test, the final biodegradability is greater than 60%).
- No risk to septic tanks.
- Prevents the risk of blocking and clogging.

ADVICE:

- Includes a long format extension tube to treat hard-to-access areas (toilet bowl rims, urinals, sink plugholes...)
- Used with BIOCAN ULTIMATE for pipe/drain line maintenance.
- Available in 2 longer-lasting scents:
 - Original.
 - Vénus - SCENT EXCLUSIVE TO IPC.

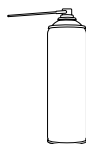

INSTRUCTIONS FOR USE:

- Ready to use. ● Shake the aerosol. ● Using the extension tube spray directly into the sink plughole, bathtub, shower, etc., once per day.
- For toilet and urinal bowl rims, treat 2 to 3 times a week. ● CAUTION: Do not store the aerosol in the cold.

PROPERTIES:

- Complex of biosurfactants specially selected for organic deposits (*Not an organic farming product*).
- Blue liquid (Original) and Pink (Venus) liquid.
- Density: 1. ● VOC: <17%.

PACKAGING:

Aerosol
with extension tube
750 ml
