INNOVATIVE:

- Biotechnological formula composed of micro-organisms and biosurfactants for maintaining cold system melt water drain lines.
- Hydrolyses fats/grease, starch and cellulose.
- Liquefies the condensation gel with a long-lasting action against rising odours.
- Contains a molecule that immediately blocks unpleasant odours.

PROTECTS:

- Unclogs drain lines.
- Prevents deposit formation in drain lines.
- No hazard warning icon. Environmentally-friendly, user-friendly.

ADVICE:

- Can be used in all drain lines that discharge water via evaporation or other system.
- Ideal for: refrigerators, display cases or wholesale cold rooms, agro-food industries, logistics centres, restaurants, bakeries, delicatessens...

INSTRUCTIONS FOR USE:

- Dilute at 10% (Water temperature <math><40^{\circ}\text{C}</math>).
- Slowly pour 1L of the solution:
 - directly in the drain line of each melt water discharge.
 - into the condensation water receptacle.
- Start-up: 1 treatment/week for 1 month.
- Maintenance: 1 treatment/month.

PROPERTIES:

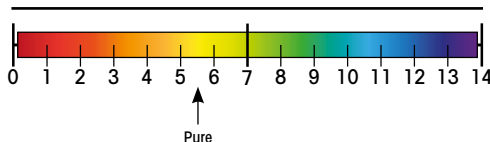

- Green liquid.
- Density: 1.005 ± 0.010 .
- Steam pressure: 23 hPa.

PACKAGING:

Barrel
5 L
