In case of massive inhalation, move the victim to fresh air.
No adverse effects anticipated by this route of exposure incidental to proper industrial handling.

4.1.2. In case of splashing or contact with eyes:

Rinse the eye thoroughly with lukewarm water (20 to 25 ° C), soft and clean (or with physiological saline), for at least 15 minutes, keeping the eyelids open. Avoid splashing towards the unaffected eye (e.g. using a compress). Water always flows from the nose to the ear. Move the eye in all directions when rinsing.
Take out contact lenses if the victim wears lenses and if it is possible to take them out of the eyes easily. Continue to rinse.
If the eye irritation persists, or if new symptoms (pain, visual discomfort) occur, consult an ophthalmologist.

4.1.3. In case of contact with skin:

If skin irritation persists, or in case of allergic manifestation, consult a specialist doctor.

4.1.4. In case of ingestion:

Rinse mouth.
Do not induce vomiting, rinse mouth.
Consult a doctor immediately.
Bring to the free air in case of massive inhalation. Keep him in a warm place and at rest. Consult a doctor.

4.2. Main symptoms and effects, both acute and delayed:

The main known symptoms and effects are described on the labeling (see section 2.2) and / or in section 11.
